Inspection Continuation Sheet

Page 3 of 3

9. Protection of Fish, Wildlife and Related Environmental Issues

Riparian monitoring location V22 was sampled to collect baseline data of the vegetation in this area. The site is located in the Kanab Creek drainage just below the proposed North Lease permit boundary.

12. Backfilling And Grading

As requested photos were taken of the backfilling activities at a vantage point near the Southeast corner of pit 8. Kirk also took a phone panorama from the same point and sent it to Cheryl Parker.

16.b Roads: Drainage Controls

Recent precipitation events had created ponding or sinkhole conditions on the East and West sides of the county road at the lowest point along the county road North of the Dames turnoff. Affected areas along both sides of the road had been regraded. A culvert may need to be installed in this area.
